Dear Parent/Carer,

Child Health Screening Programme - Vision Testing for Reception Class

We are planning to visit your child's class to carry out vision testing; this is part of the health-screening programme that we offer to all children during their first year at school.

The purpose of testing children's vision is to identify those children with reduced sight in one or both eyes and to refer them for treatment; the correction of reduced vision helps children to achieve their best at school and to do well in life. Reduced eyesight often goes unnoticed by the child, their parent/carer and teachers.

The vision test we use has been developed for use with children and it is suitable for children with disabilities and those who do not speak English or are not familiar with the Roman alphabet.

Trained members of the School Health Team carry out the vision test, and results of the test will be sent to you. If necessary your child will be referred for further testing at a local optical practice providing this service. You will be offered a list of practices from which you can choose where your child has their further assessment. We encourage you to share the results of the vision test with the school.

If you are happy for your child to be seen and their vision checked, you do not need to do anything else.

If, however, you do not want your child to be seen, please write to the service via the school office or email: CH-TR.croydonschoolnurses@nhs.net within the next 14 days. Thank you.

If you have any concerns about your child's health that you would like to discuss, or would like further information about how your child's data will be used, please phone the School Health Team at the number above.

Further information on Vision screening for 4 to 5 year olds can be found at https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/65343/4/vision_screening_parent_leaflet.pdf

Yours faithfully,

Wilma Munzara
